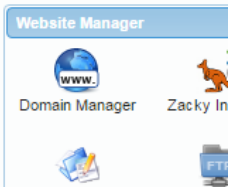
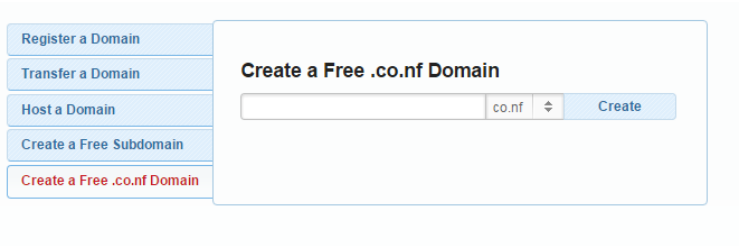
WORDPRESS INSTALL Steps:

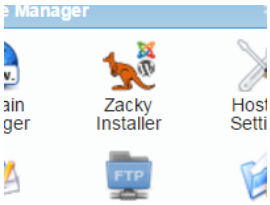
1. Install Wordpress onto your host platform by logging onto Biz.nf
2. Create a new URL by going to the Domain Manager.



3. Create a new Free co.nf domain. This will be the URL for your project.

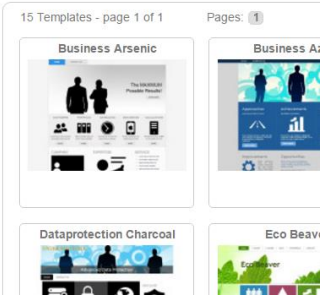


4. Go back to your Dashboard. Click the "Zacky Tools" installer.

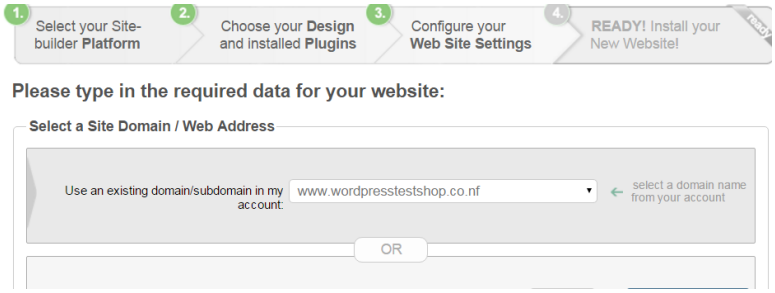


5. Choose "Wordpress" install.

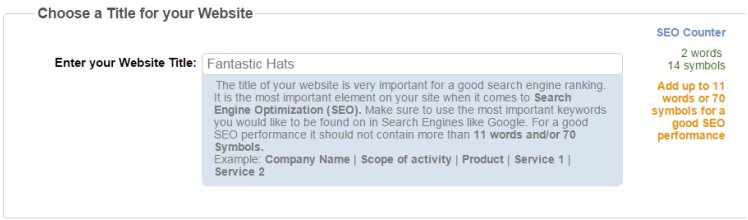
6. Choose a template. Don't spend too much time agonizing over which one to choose. We will be building / heavily modifying custom templates later.



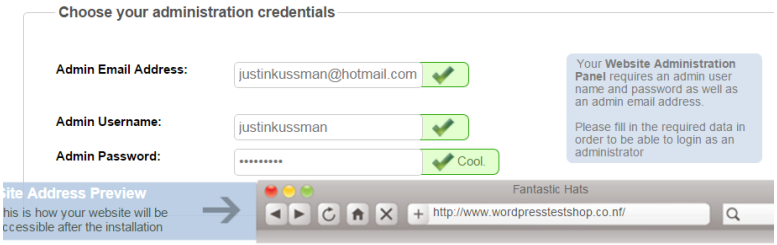
7. Do not choose any of the plugins on the next step. There is a list of functional plugins you will install later, so just choose next.
8. Choose the domain you created on step 3 for your wordpress install.



9. Choose a Title for your website. Choose something descriptive. Google uses this site title heavily for SEO purposes.



10. Input an email address, Username and Password. REMEMBER THESE LOGINS! If you forget your username/password for wordpress, you must delete your entire website and re-install it. Click "install now" when ready.



11. Once the install completes, you must go to your Wordpress login by inputting www.yoururl.co.nf/wp-admin. The /wp-admin suffix is the way you access any wordpress installation.

PART 3 – Template and Plugin Install, adding Content.

1. . Find a template and install it through the Appearance > Themes menu inside Wordpress, or download one from the web.
2. Change the visual settings for your theme through the Appearance > Customize menu.
3. More in-depth changes to your theme can be managed through modifications to your Custom CSS Sheet in the Appearance > Editor > Stylesheet section. BE SURE to make a copy of your CSS Sheet before you make any edits!!
4. Install the following plugins:
    - WordPress SEO by Yoast
    - Contact Form 7
    - Updraft Plus
    - Meta Slider
        - Woo Commerce
        - Simple Custom CSS
        - Wordfence Security

7. When you finish installing plugins, create Pages by going to the Pages>Add New tab on the left side of your dashboard. Create and populate, with graphics and text, the following pages:
- HOME
- ABOUT
- CONTACT
- 2 pages of your choice.

The site content should be for a "small business website."

7. When complete, take screenshots of the following things:
    a. Your wordpress dashboard
    b. Your plugins page with the above plugins installed.
