

## Web Design 1– Week 3 Assignment

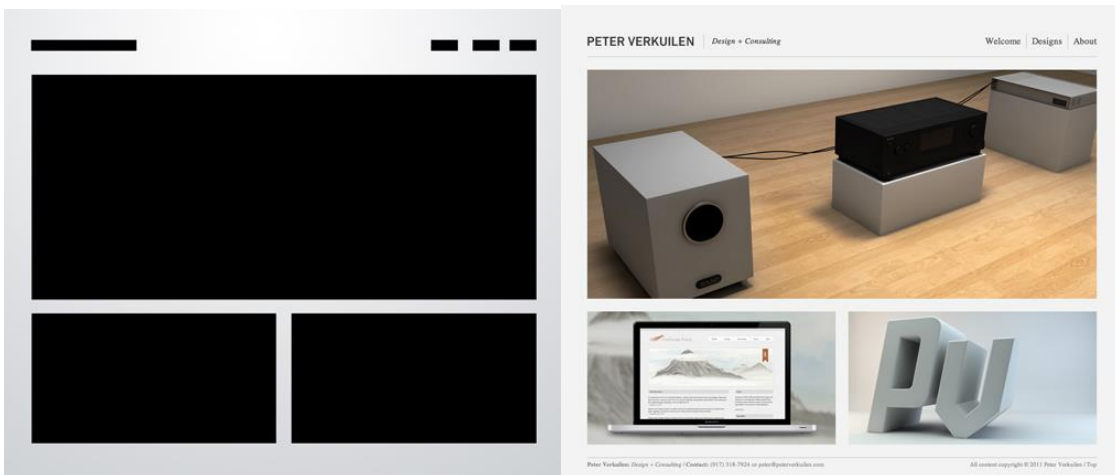

### PART 1

Your second assignment is to create a refined version of your first site. Use the content (and add to it if you need more) from your first site to create this site revision. Be sure to copy your files into a separate folder BEFORE you begin the assignment so you don't overwrite the week 2 assignment.

1. Convert your page to use only an External CSS Sheet.
2. Change 2 of your pages to match the layout example below:

4. Change 1 of your pages to match the layout example below:

5. Create a Nav bar using UL / Li code and style it with CSS.
6. Create at least 1 iframe embed (a youtube video is the easiest).
7. Drop your files on the Instructor Computer when you arrive in class on Tuesday.

**PROF TIP: Use the Grid Generator to help you with responsive layouts!**
