

Web Design 1 – Week 2 Assignment

Your first assignment is a gauge of skill level in web design. This is necessary to establish which concepts need to be reviewed before we jump into new material.

Use your prior knowledge (if you haven't done html, css previously, please email me to set up a time to help you catch up) and any online HTML and CSS resource to produce a webpage from scratch, with the following criteria:

1. 3 page total structure with the following content requirements:
 - a. About Me Section
 - b. Description of your Major / Minor and how you plan on using this degree.
 - c. Your 5 year plan
2. Basic HTML structure for the page including:
 - a. Page titles
 - b. Headlines on each page with H1 and H2 tags
 - c. Body copy of approx. 30-100 words per page with 1 instance of color body copy
 - d. At least 1 image on each page
 - e. At least 1 external link
 - f. Navigation bar
 - g. Inline CSS (css to change a heading color for example).
 - h. External CSS Sheet
 - i. Any interesting bells and whistles that you can add to the page in order for me to assess your skill level.

- Be sure to save all of your files, pics, etc to the correct folders in your structure. Please put your full name (no nicknames or shortenings) on the main folder.

- Write down any challenges, questions, issues that you had designing this page. Bring these notes to class next week so we can discuss the challenges everyone faced in this assignment.

- Turn your assignment in by:

- a. Zipping your website folder (right click to zip/compress)
- b. Upload this zip file to canvas.
